

Aswin R *Java Full-stack Developer*

ceaswin146@gmail.com | 8590743771 | Kerala | [linkedin.com](#) | [github.com](#)

PROFILE SUMMARY

Java Full Stack Developer with hands-on experience in building scalable backend systems using Java, Spring Boot, and Microservices architecture. Skilled in developing RESTful APIs, implementing event-driven systems using Apache Kafka, and working with MySQL and Redis. Experienced in multithreading, concurrency, Docker, and secure authentication using Keycloak and JWT. Strong understanding of distributed systems, problem-solving, and backend engineering concepts with a passion for learning modern cloud and DevOps technologies.

SKILLS

Programming Languages : Core Java, JavaScript, SQL, Python |

Backend Technologies : Spring Boot, Spring MVC, Spring Cloud, REST API Development, Hibernate, JPA, WebFlux, Microservices | Frontend Technologies : React.js, Redux, HTML5, CSS3, Bootstrap |

Databases & Messaging : MySQL, Redis, Apache Kafka | DevOps & Cloud : Docker, GitHub Actions, CI/CD, AWS |

Tools & Platforms : Git, GitHub, Swagger, Postman, Keycloak, Eureka Server, API Gateway |

Core Concepts: Data Structures & Algorithms, Multithreading, Concurrency, OOP, SOLID Principles, Agile/Scrum |

PROJECTS

Vendora — Microservices-Based Service Marketplace Platform

Technologies: Java, Spring Boot, Spring Cloud, Keycloak, Kafka, Redis, React, MySQL, Docker, Eureka, API Gateway, Git

- Built a scalable microservices-based service marketplace platform with 9+ independent services supporting real-time booking and communication workflows.
- Designed a Microservices architecture using Spring Boot and Spring Cloud with Eureka Service Discovery and API Gateway.
- Implemented secure authentication and authorization using Keycloak with OAuth2 and JWT.
- Developed real-time chat functionality using Socket.IO [↗](#), reducing communication delay between users and providers.
- Implemented event-driven communication using Apache Kafka for asynchronous order processing and notification handling across distributed services.

GitHub : <https://github.com/axwinachu/Vendora> [↗](#)

rxFlow — Concurrent Task Orchestration Engine

Technologies: Java, Multithreading, Concurrency, ReentrantLock, Executor Framework

- Developed a concurrent task orchestration engine capable of handling 100+ asynchronous tasks using custom work-stealing scheduling.
- Implemented DAG-based dependency resolution with cycle detection using topological sorting algorithms.
- Built retry and fault recovery mechanisms using exponential backoff and Dead Letter Queue concepts.
- Designed thread-safe execution using ConcurrentHashMap, ReentrantLock, and Condition-based coordination.

GitHub: <https://github.com/axwinachu/RxFlow> [↗](#)

Shall Jewels — Distributed E-Commerce Backend System

Technologies: Java 21, Spring Boot, Spring Cloud, Kafka, JWT, MySQL

- Developed a Microservices-based e-commerce backend system using Java 21 and Spring Boot.
- Implemented API Gateway and Eureka Service Discovery for centralized routing and service communication.
- Built event-driven communication using Apache Kafka for asynchronous order and email processing.
- Developed secure REST APIs for User, Product, Cart, and Order services following layered architecture principles.
- Integrated Spring AI capabilities for intelligent response handling and extensible AI provider support.

EXPERIENCE

Full Stack Java Developer Intern, *Bridgeon Solutions*

06-2025 – Present
calicut

- Developed backend features and REST APIs using Java and Spring Boot.
- Collaborated in Agile/Scrum-based development workflows and sprint review meetings.
- Worked with database integration, debugging, and API testing.
- Participated in code reviews and learned industry-standard software development practices.

EDUCATION

Bachelor of Computer Science, NGM College
Percentage : 71%

2022 – 2025
Coimbatore

CERTIFICATES

IBM Cloud Envision – IBM: Learned cloud computing fundamentals and cloud platform concepts.

LANGUAGES

English | Tamil | Malayalam
